

**PROJECT NOTE:**  
 These drawings are scope documents, indicating the general project design concept, dimensions of the project, major architectural elements, and basic organization of structural and mechanical, electrical and plumbing systems. As scope documents, these drawings do not necessarily describe or indicate all materials or work required for full performance and completion of the project. On the basis of the general scope indicated or described, the contractor (a) shall furnish all items required for proper execution and completion of the proposed project. The Architect is not responsible for the failure of the contractor(s) to execute necessary work and supply required materials for proper completion of this project, and makes no warranty said or implied on these construction documents. All changes with respect to the scope of these documents shall be finalized with the Architect and Owner and communicated in writing to the contractor (a).  
 The agreement between the Architect and any other party involved with this structure does not include on-site inspections and observation, and due to the fact that the Architect has completed only working drawings for this structure, the Architect cannot assume responsibility for construction, construction methods, or safety precautions used by contractor(s).
